Subject: Basin Plan Amendment and "Incidental Runoff"

Hello-

I am very concerned about this "Incidental Runoff" amendment. It is apparent that it is just a vehicle to avoid responsibility for poor planning on your agency's part. Allowing "incidental runoff" of irrigated wastewater in the summer when flows are low and creeks are most vulnerable seems wrong. With all the serious unknowns involved in this plan, they need to be dealt with prior to passing the amendment, not after it passes. We can't let the city be absolved from suits when they let this happen. Please count me against this and add my vote to those strongly opposed to this amendment.

Thanks, John Lyhne
